

EDUCATION

Treasure Valley Community College – ONTARIO OR

2024 - 2026

Associate degree in Cybersecurity (Sophomore)

CAPE PENINSULA UNIVERSITY OF TECHNOLOGY – CAPE TOWN

2019 - 2022

Associate Degree in Mechanical Engineering Recipient of Dean's List Academic Achievement Award

About Me

I am a 24-year-old young man with a go-getter mindset and Aspiring IT and Mechanical Engineering professional with hands-on experience in CNC machining, DXF modeling, and helpdesk support. I am adept at troubleshooting, CAD/CAM design, and eager to contribute to technical teams through adaptability and a strong work ethic. I know I can adapt and thrive in any environment I am put into; I believe my versatility is proven by my ability to take on both mechanical and IT Engineering career paths. Looking forward to upscale your workforce. I am willing to relocate for the right company.

PROFESSIONAL EXPERIENCE

Treasure Valley Community College

Sep 2024 – June 2025

IT HELPDESK INTERN

(Part Time)

- Run imaging on new computers that need to join the school's network, as well as software and Winget Updates. Provide Tier 1 support for students and staff via ticketing system.
- Troubleshoot hardware/software issues, including password resets, printer errors, and network access.
- Document support resolutions and contribute to user support knowledge base.
- Troubleshoot any connections (wire and wireless) issues students and staff might be facing. Delivering both On Call and In-person assistance.

LEUCO WOOD TOOLING

Oct 2022 – Dec 2023

MECHANICAL ENGINEERING INTERN

- Produced precise DXF drawings using MasterCAM for CNC wire cutting operations, enabling accurate fabrication and retipping of tungsten carbide cutters.
- Operated a centre lathe to face and prepare raw materials before CNC production, ensuring smooth integration into the clamp's jaws on the CNC Lathe (FANUC and Mazak). Trainee on CNC machining (Both Lathe and Milling).
- Assisted in manual milling machine operations to create hook angles and tungsten seating features for new tool designs.
- Performed boring operations on saw blades, including customer-specific diameter adjustments and pinhole placements.

AMTL ADAPTRONICS

Oct 2021- Apr 2022

MECHANICAL ENGINEERING INTERN

- Gained hands-on experience with Pinnacle milling machines and developed foundational skills in drilling, filing, and sharpening.
- Designed mechanical components using SolidWorks, AutoCAD, supporting prototype development and small-scale manufacturing.
- Utilized centre lathe turning techniques to fabricate components required for internal engineering projects.
- Acquired practical experience in lathe operations, drilling, arc welding, filing, and various essential workshop techniques.
- Led the FEA (Finite Element Analysis) and mechanical design of a foldable livestock trailer as part of a capstone project.
- Participated in laboratory experiments and coursework across disciplines such as thermodynamics, fluid mechanics, strength of materials, and CNC machining.
